	ct code	01888	
Version			
Issue date		13.10.2020	RENSHAW
Range		Flower & Modelling Paste	THE PROFESSIONALS CHOICE
Product title	Grass Gree	en Flower & Modelling Paste SG	
Product descri	ption		
A green ready	to use modellii	ng paste.	
Pack size:			8 x 250g e

#### Legal name

Sugar paste

#### Ingredients list

Sugar, Glucose Syrup, Water, Stabilisers: Tragacanth Gum, Xanthan Gum; Palm Oil, Preservative: Potassium Sorbate, Colours: Curcumin, Brilliant Blue, Vegetable Carbon; Humectant: Vegetable Glycerine.

#### Made in a factory that handles nut ingredients (Almonds)

Composition	Typical	Countries of origin
	figures %	
Sugar	80 - 90	Angola, Australia, Barbados, Belize, Benin, Brazil, Burkina Faso, Colombia, Costa Rica, Dominican Republic, El Salvador, Ethiopia, Fiji, France, Guadeloupe, Guatemala, Guyana, Honduras, Ivory Coast, Jamaica, Kenya, Laos, Madagascar, Malawi, Mauritius, Mozambique, Nepal, Nicaragua, Panama, Reunion, Suriname, Swaziland, Tanzania, United Kingdom, Zambia
Glucose Syrup	5 - 10	UK, Netherlands
Water	5 - 10	ик
Stabiliser: Tragacanth Gum (E413)	1 - 5	Iran, Turkey
Stabiliser: Xanthan Gum (E415)	1 5	China
Palm Oil	<1	Papua New Guinea, Solomon Islands, Malaysia, Indonesia
Preservative: Potassium Sorbate (E202)	<1	China
Colour: Curcumin (E100)		Denmark
Colour: Brilliant Blue (E133)	<1	ик
Colour: Vegetable Carbon (E153)		ик
Humectant: Vegetable Glycerine (E422)	<1	UK, Germany, Belgium, France

Colour pigment		
E100	437.804 ppm	
E133	37.526 ppm	
E153	38.916 ppm	

Palm oil details	
Contains components sourced from Palm Oil/Palm Kernel Oil and/ or derivatives	Palm Oil
RSPO information	Palm oil and finished product is RSPO SG supply chain certified.

Nutritional		
Method: Calculated	Typical figures per 100 g	
Energy (kJ/kcal)	1572 / 370

Dietary information		
	Suitable for	Comments
Vegetarians	Yes	
Vegans	Yes	
Kosher	Yes	Certified. Certificate available on request.
Halal	Yes	Certified. Certificate available on request.

#### **Genetically modified materials**

To the best of our knowledge, this product is not made from genetically modified material and does not use processing aids or additives which are genetically modified. A GM policy is available on request.

#### **Irradiated materials**

This product does not contain any ingredients that have been treated with ionising radiation.

#### Nanomaterials

This product does not contain any engineered nanomaterials.

#### Shelf life: unopened

12 months from date of manufacture.

#### Shelf life: opened

Once opened, it is the responsibility of our customers to establish the maximum permitted time until all material should be used. This will depend on their specific environment, practices and procedures.

validation testing.				
Substances or products causing allergies or intolerances				
Substance	Product ingredient contains?	Used on same production line?	Used in same Factory	Comments
Cereals containing gluten, wheat; rye; barley; oats; spelt; kamut and products thereof,	No	No	No	
except: wheat based glucose syrups including dextrose.	Yes	Yes	Yes	Exempt from allergen labelling
Crustaceans and products thereof	No	No	No	
Eggs and products thereof	No	No	Yes	Dried Egg White

Molluscs and products thereof	No	No	No	

Microbiological testing			
At the time of manufacture			
Organism	Target	Maximum	
тvс	<5000 cfu/g	5000 cfu/g	
Yeasts & Moulds	<10 cfu/g	100 cfu/g	
Enterobacteraceae	<10 cfu/g	10 cfu/g	
Salmonella	Not detected in 25g	N/A	
CLAS accredited methodology used. Test frequency based on risk assessment (JF Renshaw Ltd, in-house lab)			

Chemical			
Test	Method	Standard	
Moisture	Karl Fischer titration	6.0 - 7.0%	

Physical	Physical		
Test	Method	Standard	
Appearance	Organoleptic	Green coloured sugarpaste. Free from any visible lumps or specks.	
Flavour	Organoleptic	Sweet	
Texture	Organoleptic	Smooth to slightly powdery and soft to the bite leading to a pasty, sticky mouth coating which then dissolves away.	
Aroma	Organoleptic	Sweet	

#### **Brief process description**

Milled sugar is combined with fat, glucose, gum and colour to give a ready to roll icing which is perfect for modelling. The paste is packed, checkweighed and metal detected.

#### **Overview of HACCP - available upon request**

#### **Metal detection**

Checked at start up, every hour and end of each packing run: 2.5mm Ferrous, 4.0mm Non-Ferrous, 5.0mm Stainless Steel test pieces

#### Sieves

Not appropriate for this product type.

#### Packaging

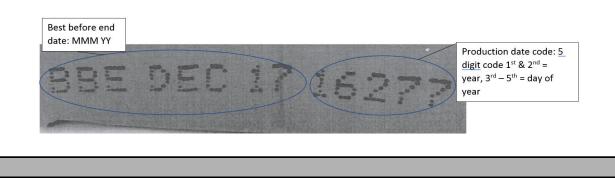

Printed 12µm Alox PET/ 38µm LLDPE film with a 3 page peel & reveal label applied to back of pack. Packed 8 per corrugated cardboard shelf ready outer case. Outer case label applied. 63 cases per layer, 4 layers high, 252 cases per pallet. All pallets shrink/stretched wrapped.

#### **Recycling information**

Film - Plastic not currently recycled Outer tray - Card widely recycled

#### Production date code

5 digit code. 1st & 2nd = year; 3-5 = day of the year e.g 26/08/2016 = 16238 In the event of any issues, please quote information as per example below:

Health & safety o	lata	
Physical Appearance		Green coloured sugarpaste.
Ingredients		See ingredients section of the specification.
Intended use		For bakery use.
Storage & Handli	ng	See specification.
Occupational exp	osure hazards	None, under normal conditions of use at room temperature. Avoid eye contact.
Fire/explosion hazard		The product will burn if ignited, but under normal conditions of use, will present no fire risk.
	Eyes:	Flush with plenty of water. Seek medical advice if needed.
First Aid	Skin:	Wash with soap and water.
FII'ST AIU	Ingestion:	No hazard under normal conditions of use.
	Inhalation:	No hazard under normal conditions of use.
Spillage		Wash area with detergent and water to avoid slip hazard.
Disposal of waste		Normal waste disposal in accordance with local and national laws.
Other hazards		None known.
Protective clothing		Normal for food handling.

#### Flower & Modelling Paste handling and usage instructions

Flower & Modelling paste is typically made from icing sugar, glucose syrup, vegetable oil, stabilisers, glycerine and preservative; colours may also be added. (Refer to the ingredients list).

#### Possible applications:

Fine modelling, flower models.

#### **Recommended storage**

Flower & Modelling paste should be stored in dry conditions between 5°C and 18°C, away from heat sources and odorous materials. The shelf life of icing is recommended provided the packaging remains unopened and product is stored correctly. It is the responsibility of our customers to carefully consider and establish that the Flower & Modelling paste lasts for the required shelf life of their end products.

#### Recommended handling and processing: a) Opening

Once opened, Flower & Modelling paste should not be exposed to air for prolonged periods as product will harden and also potentially become prone to microbiological contamination.

Once opened, it is the responsibility of our customers to establish the maximum permitted time until all material should be used. This will depend on their specific environment, practices and procedures.

#### b) Unused material

Any unused material should immediately be wrapped in close fitting polythene, expelling as much air as possible; then stored in an airtight container for later use.

It is the responsibility of our customers to carefully consider and establish that any re-wrapped material is fit for purpose when using it.

#### c) Handling

For best results before using the Flower & Modelling paste, ensure it's tempered to room temperature.

Gently work the paste with fingers to warm it and to improve elasticity and pliability.

#### d) Rolling out

Roll out the Flower & Modeling paste on a non-stick surface using a rolling pin and dust the work surface with icing sugar, avoid using an excess of icing sugar as it will cause icing to dry out and crack. A white fat such as Trex could also be used.

Never roll out cold Flower & Modelling paste, always ensure you knead the product before rolling out.

Avoid the use of flour to prevent sticking or aid sheeting, as this will potentially introduce both a microbiological and allergen issue.

#### e) Flowers & Modelling

When dusting or assembling decorations, the items should be left to dry for approximately 12 hours prior.

#### f) Adherence of models

Alcohol, clear spirit or cooled boiled water is recommended to be applied to model surface in order to aid adherence to an icing layer.

Rework

Ensure rework is not overexposed to air or moisture causing drying out or stickiness. Where material is reworked this should not be contaminated with cake crumb or jam.

Rework material should be kept in a cool dry place, wrapped well and used within a short period of time.

It is the responsibility of our customers to carefully consider and establish that any re-work material is fit for purpose and that the maximum permitted time until all material should be used when using it, depending on their specific environment, practices and procedures.

Things to be aware of:

Occasionally small sugar lumps can be found in Flower & Modelling paste, the lumps can be easily removed.

Flower & Modelling paste may dry out or crack if it has been over exposed to air during or prior to handling, too much dusting sugar will also cause drying out and cracking.

Flower and Modelling paste may become sticky if it has been exposed to moisture during or prior to handling.
